Executive Summary

Refocusing the Lens: Expanding Services for Inclusion

This advocacy plan is for the Atlanta University Center (AUC) Robert Woodruff Library, which serves Spelman College. Spelman is an all-female historically Black college in Atlanta, GA. The community is comprised of approximately 2,100 students and 625 faculty and staff.

Goal

The Robert Woodruff Library seeks to advance Spelman College's mission of academic excellence and leadership development by expanding services to provide more inclusive programming and resources for the Spelman community. The library aims to focus on communities that have been previously underserved by the college.

Process

This plan begins with redefining the Robert Woodruff Library's Mission, Vision, and Values, followed by a community profile of Spelman College. Based on an assessment of this profile, the library plans to expand and develop services targeting three specific communities that have been historically marginalized.

The Programs

1. First Generation Library Cohort Program
2. ASPIRE: Autism Support Program for Inclusion, Resources, and Empowerment
3. The Keo O'Neal LGBTQIA+ Special Collection

Timeline and Conclusion

These programs will be developed and implemented over a one-year period. A focused approach to incorporating more inclusive programs and resources will strengthen the Woodruff Library's mission and vision to provide greater access and services to diverse populations.

Description of Library Setting

The Atlanta University Center (AUC) Robert W. Woodruff Library was constructed in 1982 (AUC Robert W. Woodruff Library, 2023a). It serves the consortium of Clark Atlanta University, Morehouse College, Spelman College, and the Interdenominational Theological Center. The former three institutions are members of the AUC Consortium (AUC Consortium, 2023). Interdenominational Theological Center is an interfaith group of five historically Black seminaries and fellowships (Interdenominational Theological Center, 2020). The library is located in downtown Atlanta. It is central to all member institutions, with a shuttle between members and the Metropolitan Atlanta Rapid Transit Authority (MARTA) system (AUC Shuttle Map, 2022). The library serves a diverse range of graduate and undergraduate students both in person and virtually. The member institutions of the library-sharing consortium consist of historically Black universities, colleges, and seminaries, and this helps inform the values, mission, and goals of the library.

Woodruff Library acts as the information and technological hub for the AUC and is a model repository for information resources. The member institutions depend on the library for information and research-related requests, meeting and study spaces, and standing exhibits and collections (AUC Robert W. Woodruff Library, 2023a; AUC Robert W. Woodruff Library, 2023c). It is for this reason that programs that focus on specific populations, especially those underserved by traditional programming, are vital. As the main source of support, there is an obligation to provide comprehensive programs that try to fulfill the educational needs of all students. Additionally, since the schools share the library, any program that provides support for one subset can be replicated in other institutions as well, benefiting all the organizations served by the library.

Vision, Mission, and Values Statement

Vision Statement

To be the foremost resource for enhancing the research capabilities of our member institutions, promote academic excellence, advance equity in education, and centralize engagement between the Atlantic University Center's diverse communities.

Mission Statement

Our library supports the academic excellence of historically Black colleges and universities within the Atlantic University Center Consortium. We aim to promote social change efforts through cultural preservation practices, access to global information resources, and civic engagement. We equip diverse populations with the resources and skills to continue their development as transformative leaders.

Values Statement

Quality Service for all Customers: Every patron visit is an opportunity to provide access to world-class standards of knowledge and experience from staff.

Respect for the Individual: Respect promotes safer and more welcoming spaces.

Engagement Through Actions: Socially and academically engaged students better their peers, the university, and themselves.

Diversity as a Standard: Diversity of thought and experiences enables growth and development.

Empowering Students and Staff: Empowering the community with knowledge can pave the way for a multitude of opportunities.

Community Profile

Spelman College is an all-female majority-Black HBCU (College Data Analytics Team, 2023; Institute of Education Sciences, 2022). While Spelman cannot be categorized as racially diverse, it must be noted that the school was founded with the mission of educating Black women (United Negro College Fund, 2022). Most students are between the ages of 18 and 21 years; the college's young population is representative of a traditional undergraduate community. Spelman is geographically diverse, with students from all over the United States and abroad (College Data Analytics Team, 2023).

During their academic pursuits, Spelman students meet like-minded peers, which facilitates making connections. From sports to sororities, there are plenty of readymade cliques available to make connections among peers (Spelman College, 2023h). Spelman's location, near the heart of downtown Atlanta, presents opportunities for students to engage with their communities and an opportunity to participate in activities in Atlanta such as shopping, engaging in recreational pursuits, or participating in cultural learning events. Students enjoy a lack of travel barriers due to easy access to public transport (Spelman College, 2023b). The campus is contiguous, bordered on two of its four sides by Morehouse College and Morehouse School of Medicine; this creates an isolated environment compared to more sprawled urban campuses (Spelman College, 2023d).

Students come from different backgrounds and perspectives, but they share a common bond of sisterhood and support. As young adults exploring, experimenting, and forming their identities, Spelman students face various challenges and opportunities in their academic, personal, and professional lives. The college supports them with various services and programs that help them achieve goals and overcome difficulties (Spelman College, 2023a); Spelman

College Wellness, n.d.). Moreover, Spelman students belong to a strong community and sisterhood that values academic excellence and social justice (Mebane, 2019). Through the data collected on preferred academic majors, many Black students choose service-related industries in higher numbers in order to uplift their communities. However, this furthers the cycle of poverty, as these fields tend to pay less (Downs, 2016). Spelman deviates from this trend, as approximately 60% of the student body chooses to major in STEM fields (Spelman College, 2022). Spelman College is a place where women can grow, learn, and lead in a supportive and empowering environment.

The AUC Robert W. Woodruff Library is a centralized hub serving many diverse academic communities, including Spelman College. Spelman offers a unique and empowering educational experience by remaining true to its founding mission of educating Black women, and its location in downtown Atlanta provides ample opportunities for engagement with the local community. With a strong focus on sisterhood and support, Spelman students are well-equipped to navigate the challenges and opportunities of their academic, personal, and professional lives. The college is also successfully addressing the issue of Black students being concentrated in service-related industries that perpetuate the cycle of poverty by promoting its STEM programs. More resource-sharing systems, such as the collective use of the Woodruff Library, would benefit Spelman. By tapping the collective power of the AUC, Spelman can better position itself to take advantage of the benefits of a large urban center for the institution and its student population. Overall, Spelman provides a valuable educational experience for Black women and is important in promoting academic excellence and social justice.

Advocacy Plan

First-generation college students (FGCS) face unique challenges during their transition into college. FGCS cannot rely on parental knowledge of academic resources and must be more proactive in finding resources on their own. In addition, there is an intersection of first-generation and low-income status which adds potential difficulties with financing education and outside stressors. There are existing resources that cover the baseline needs, but by building more personalized services, FGCS can be better supported. Woodruff Library can leverage both its existing student services and Spelman College's FGCS support networks to improve existing programming to better reach FGCS. Leveraging existing systems also ensures the program can be implemented with low overhead.

Spelman College provides two comprehensive programs that support first-generation college students: First Generation Scholars and the Ford First Gen @ Spelman College. The former is a student organization that focuses on supporting first-generation students through mentorship, support groups, and development seminars (Spelman College, 2023e). The latter is a comprehensive development program that pairs incoming students with peer mentors, supplemented by seminars, excursions, and internship opportunities (Spelman College, 2023f). These connections are important secondary information sources as the students have strong ties with each other and view their peers as a trusted network with similar experiences and backgrounds.

The library supports a diverse assortment of undergraduate and graduate-level students at several institutions in addition to Spelman College. Faculty can request instructional sessions and orientations for themselves or their students (AUC Robert W. Woodruff Library, 2023c). This on-demand training is supplemented by a virtual orientation portal, which provides specific

information for undergraduate and graduate students (AUC Robert W. Woodruff Library, 2023d). While virtual training is a valuable resource that students can refer to at any time, having a more hands-on approach ensures that FGCS will be exposed to information about library services. The current system requires students to be proactive in searching for this information or be enrolled in courses that utilize the library's training and orientation services. By connecting the existing training and orientation services offered by the library to Spelman's FGCS support network, the library will be better positioned to engage FGCS.

By supplementing the existing FGCS programs with training and orientation sessions, the library can utilize the positive associations with peer and student organization support networks to make its programming more impactful for FGCS. This initiative would start at the beginning of the school year by allocating tour, lecture, and orientation times specifically for members of the First-Generation Scholars and Ford First Gen. The tours and orientations will also reinforce information communicated during new student orientation. Information and concerns more targeted towards FGCS can be addressed, and the smaller group size encourages more active participation. Future programming expansions include allocating reservation blocks to organizations that support FGCS to create a collaborative study hall environment aimed at promoting positive group study dynamics. Overall, the systems exist already to support FGCS, but the issue is ensuring that these students are aware of the programs and utilizing them. By working with existing support networks, the Woodruff Library can seamlessly improve existing offerings and tailor them to support FGCS.

Autism spectrum disorder (ASD) is a neurodevelopmental disorder that affects social communication and behavior. ASD, which is being diagnosed in increasingly greater numbers in the United States, manifests in individuals differently and to varying extents (Maener et al.,

2023; Riley, 2018; Shea & Derry, 2019). College students with ASD often struggle in higher education settings (Riley, 2018). Autistic individuals who are Black or female are faced with even more challenges because of the later age of diagnoses for girls and women and for Black children, cultural stigmas around diagnosis and treatment in the Black community and for girls or women, and lower rates of access to medical care for Black people (Riley, 2018; Sturm & Kasari, 2019). These factors can cause delayed academic, medical, and social support (Lai et al., 2015; Riley, 2018). Because women, adults, and Black people – Spelman students are all three – have often been overlooked in autism treatment, these students represent an underserved population that faces unique challenges and can benefit from specialized library services.

The Woodruff Library is therefore developing a new program, the Autism Support Program for Inclusion, Resources, and Empowerment (ASPIRE), to raise awareness of the library's services. ASPIRE will support the success of Spelman students with ASD by creating a safe space, providing academic and social support, raising awareness about autism, and promoting self-advocacy. The library first will conduct a needs assessment survey among students who self-identify as non-neurotypical to better understand and address their specific needs (American Library Association, 2009). Because of the stigma surrounding autism diagnosis and treatment, it is important that ASPIRE is welcoming and inclusive to anyone who identifies as autistic, including self-diagnosed autistic students.

The centerpiece of ASPIRE is the conversion of one of the library's study spaces into the ASPIRE room, a sensory-friendly safe space. Autistic individuals can suffer from sensory overload (Braumberger, 2021), but many autistic students already view academic libraries as a refuge, although this can be improved upon (Shea and Derry, 2019). The ASPIRE room will be designed for the comfort of autistic students; students can borrow equipment that can help with

sensory overload such as noise-cancelling headphones or stress balls, that they can use anywhere in the library. It will also be a hub for social and educational support for autistic students, with books and resources on neurodiversity and mental health, as psychiatric conditions are often comorbid with ASD (Shea and Derry, 2019). Flyers and notices will promote academic support services. The library will also organize a social club where autistic students can gain peer mentorship experiences and learn about social skills and self-advocacy, which are important for autistic individuals' actualization and success in life (Shattuck et al., 2014; Shea & Derry, 2019).

As a central hub, the Woodruff Library can situate ASPIRE to work with departments across the AUC. To do this, library staff requires training to understand the unique needs of this population and learn about autism awareness and acceptance (Braumberger, 2021). These workshops will be created in conjunction with the Student Access Center, which provides services for Spelman students with disabilities (Spelman College, 2023g), and Student Success Tutoring, which provides academic support to Spelman students (Spelman College, 2023i), and be open to anyone on the AUC campus.

In 2021, Spelman became the first HBCU to create an endowed chair in Queer Studies with funding from philanthropist Jon Stryker. The position, named for poet Audre Lorde, was created to educate and inspire the next generation of LGBTQIA+ advocates (Kai, 2021). To support the work that will be influenced by the Audre Lorde Chair, the Woodruff Library will be developing a Queer Studies special collection that will serve to aid in research, instruction, and education. In the wake of widespread anti-LGBTQIA+ legislation and attacks on the Queer community, creating a safe space through more visible representation is a top priority (Herder, 2022). The collection will be named for Spelman's first openly transgender student, Keo O'Neil, (Helm, 2018).

The Woodruff Library plans to begin by assessing the existing LGBTQIA+ collections and determining what the campus community would like included in the Keo O'Neal Special Collection. The assessment will follow the methodology created by Proctor in assessing the collections of Penn State University Libraries. As LGBTQIA+ content is multidisciplinary in nature, it is key to use multiple methods of assessment to address shortcomings. A combination of a quantitative method with peer comparison and a qualitative method with two list-checking analyses will be used (Proctor, 2020). For community assessment, the Woodruff Library plans to partner with- Afrikete, a student organization that works to create safe spaces for Queer students (Afrikete, n.d.). Assessment of community needs will be completed through anonymous surveys that utilize both quantitative and qualitative data. By employing a trusted organization and student advocates, the library hopes to have a high level of participation and to help center ownership of this collection among the Queer community. This partnership will continue throughout planning and implementation to ensure that the library meets the needs of all community members and ensures the safety and privacy of those utilizing the collection.

Next, the library will partner with the Arcus Foundation for funding. The Arcus Foundation is committed to supporting LGBTIA+ initiatives and promoting social change and was founded by Jon Stryker, who funded the Audre Lorde Chair for Queer Studies. Spelman has also previously worked with the Arcus Foundation (HBCU Buzz, 2015; Kai, 2021). The Woodruff Library plans to build upon the relationship Spelman has facilitated with the Arcus Foundation to fund the Keo O'Neal Special Collections.

Timeline

Advocacy Plan Timeline													
	July	Aug	Sept	Oct	Nov	Dec	Jan	Feb	March	Apr	May	June	July
Designed FGCS specific training units													
Orientation and Training Session													
Review													
Needs assessment survey

Key	
FGCS Orientation	
ASPIRE	
Keo O'Neal Special Collection	

First Generation College Student Orientation Timeline		
Design	Take the month prior to the beginning of the semester to design the orientation for first year students and reflect on changes that need to be done to make it more efficient	1 Month
Orientation and Training Session	Orientation and guided tours will be mandatory for the first-year students and will take place throughout the first month of every semester	1 Month
Review	Tracking and comparing of number of first gen students that graduate to the number of students that undertook orientation tours	3 Months

ASPIRE Timeline		
Needs assessment survey	Surveys to give opportunity for students to explain their needs for support and census on how many students need support	5 Months
Staff Training	Staff will be trained for future ASPIRE room use and how-to better support students	5 Months
Locate and Establish ASPIRE Room	Plan and gather material for ASPIRE Room	5 Months
Open Designated Library Space	Open the ASPIRE Room to Spelman community	1 Month
Community Workshops & Training	Hold hour-long workshops open to AUC community on support for neurodivergent students (required for library staff)	5 Months
Collaboration	Collaborate with Student Success Tutoring and the Student Access Center (simultaneous with the workshops and training)	5 Months
Creating Social media campaign	Keep students and faculty apprised of program, progress, and raise awareness for future ASPIRE events & surveys	10 Months
Evaluation	Evaluate program successes and challenges during the events and room use; final information will be compiled at the end of the school year in May	1 Month

Keo O’Neal Special Collection Timeline		
Vision Phase	Create the Keo O’Neal Special Collection Committee:	2 Weeks
	Literature Review:	2 Weeks
	Library Collection Assessment:	1 Month
	LGBTQ+ Community Assessment:	1 Month
	Data Analysis:	2 Weeks
	Equipment Research and Space Design:	2 Weeks
Development Phase	Grant Research and Application:	1 Month
	Fundraising Organization:	1 Month
	Fiscal Year Budgeting:	2 Weeks
Implementation Phase	Materials Acquisition:	3 Weeks
	Collection Space Construction:	1 Month
	Marketing:	2 Weeks
	Staff Training:	1 Week
Facilitation Phase	Usage Statistics:	1 Year
	Analysis:	2 Weeks
	Future Recommendations:	2 Weeks

Conclusion

This advocacy plan was created to assist three populations of Spelman students using library resources and services. By offering tailored orientations and tours integrated with the First-Generation Scholars and Ford First Gen, a community of FGCS who are familiar with the library will be created, equipping this population with the resources and skills they need for success, per the library's mission. ASPIRE's goal, to market the library's support services to autistic Spelman students and increase awareness of autism in the community, aligns with the Woodruff Library's value of viewing diversity as a standard. Finally, the Keo O'Neal Special Collection will showcase the library's advocacy for and support of the LGBTQIA+ community and serve as a safe space for discourse and academic advancement, aligning with the library's mission of promoting social change through cultural preservation. All three programs enable the Woodruff Library to further its vision of promoting academic excellence, advancing equity in education, and centralizing engagement between diverse communities. These programs uphold the library's vision and values by empowering all students to advocate for themselves, deepening engagement with the community, and helping students access the resources they need to succeed.

The library will evaluate the success of this advocacy plan by conducting quantitative and qualitative evaluations and compiling data on the number of interactions within the library space for these programs and activities. Specifically, FGCS will be evaluated by the number of interactions with the tailored orientations and tours and a comparison of graduation rates for FGCS before and after the program's implementation. ASPIRE's success will be measured by monitoring the number of students who use the ASPIRE room and interact with the social media campaign. The Keo O'Neal Special Collection will be evaluated based on the number of interactions with the collection (checkout rates) and graduation rates of LGBTQIA+ students.
